

## Invivyd Announces Changes to Executive Team

February 3, 2023

WALTHAM, Mass., Feb. 03, 2023 (GLOBE NEWSWIRE) -- Invivyd, Inc. (Nasdaq: IVVD), a clinical stage biopharmaceutical company on a mission to protect humanity from serious infectious diseases, today announced that Laura Walker, Ph.D., the company's chief scientific officer and co-founder, decided to leave the company to pursue other opportunities. The management team has initiated a search process to identify her replacement. Until a permanent successor is named, Invivyd team member Lukas Dillinger, Ph.D., has been appointed as interim Head of Discovery and Pre-Clinical.

"On behalf of the company, I extend my gratitude and thanks for Laura's scientific passion and contributions that led to the company's founding and helped establish and evolve our integrated discovery platform that has generated a robust pipeline of antibody candidates against SARS-CoV-2," said David Hering, CEO of Invivyd. "We wish Laura the very best in her future endeavors."

Dr. Walker commented, "I am proud of the work I have done on behalf of Invivyd and appreciate the opportunity I've had to work alongside a group of passionate, talented, and committed individuals as we worked to solve a historic global health crisis. I continue to be optimistic about the potential of the company's antibody candidates to help provide much-needed solutions for the many people for whom COVID-19 presents a serious threat, including the immunocompromised and other vulnerable populations."

### About Invivyd

(Nasdaq: IVVD)

Invivyd, Inc., formerly Adagio Therapeutics (Nasdaq: ADGI), is a biopharmaceutical company on a mission to protect humanity from serious viral respiratory diseases. The company is developing antibodies to transcend the limits of naturally occurring immunity and provide superior protection from viral diseases, beginning with COVID-19. Invivyd's technology works at the intersection of evolutionary virology, predictive modeling, and antibody engineering, and is designed to identify high-quality, long-lasting antibodies with a high barrier to viral escape. The company is generating a robust pipeline of product candidates for use in both prevention and treatment of disease. NVD200, Invivyd's first antibody combination product candidate for the prevention and treatment of COVID-19, includes a re-engineered version of adintrevimab, an investigational monoclonal antibody which demonstrated clinically meaningful results against multiple variants of concern in global Phase 2/3 clinical trials for the prevention and treatment of COVID-19, prior to the emergence of Omicron. The safety and efficacy of adintrevimab have not been established. The company also has multiple discovery stage candidates for the prevention of seasonal influenza. ### Cautionary Note Regarding Forward Looking Statements

This press release contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Words such as "anticipates," "believes," "could," "expects," "intends," "potential," "projects," and "future" or similar expressions (as well as other words or expressions referencing future events, conditions or circumstances) are intended to identify forward-looking statements. Forward-looking statements include statements concerning, among other things, the potential for successful discovery, development, and commercialization of our antibody therapies for COVID-19 and other serious infectious diseases; the future of the COVID-19 landscape including the expectation of continued evolution and emergence of new variants and subvariants; our ongoing research and clinical development plans and the timing thereof; our plans to advance early stage antibody candidates as a potential prevention and treatment option for COVID-19, including disease caused by most variants, as either a single or combination agent; the potential for our early stage antibody candidates to demonstrate activity against predominant SARS-CoV-2 variant(s) in the U.S. and globally; our plans, technology and resources to develop therapeutic or preventative options for other infectious diseases, such as additional coronaviruses and seasonal influenza, in the U.S. and globally; and other statements that are not historical fact. We may not actually achieve the plans, intentions or expectations disclosed in our forward-looking statements and you should not place undue reliance on our forward-looking statements. These forward-looking statements involve risks and uncertainties that could cause our actual results to differ materially from the results described in or implied by the forward-looking statements, including, without limitation: the ability for Invivyd and/or other companies, scientists, clinicians or industry representatives to impact the strategy, policy or approach to drug development drafted or applied by regulatory authorities, including the FDA and EMA; the interest or acceptance by regulatory authorities of regulatory and clinical strategies to support potentially expedited development of novel monoclonal antibody therapies; the impact of any such change on the speed or success of development and commercialization of antibodies for the prevention and/or treatment of COVID-19; the ability of the company to generate and utilize tools to discover and develop antibodies to treat current and potential future variants; the impacts of the COVID-19 pandemic on our business and those of our collaborators, our clinical trials and our financial position; unexpected safety or efficacy data observed during preclinical studies or clinical trials; the predictability of clinical success of our pipeline candidates or combination of candidates based on neutralizing activity in pre-clinical studies; variability of results in models used to predict activity against SARS-CoV-2 variants of concern; clinical trial site activation or enrollment rates that are lower than expected; changes in expected or existing competition; changes in the regulatory environment; the uncertainties and timing of the regulatory approval process, including the outcome of our discussions with regulatory authorities concerning our clinical trials; whether our pipeline candidates or combination of candidates are able to demonstrate activity against predominant SARS-CoV-2 variant(s) in the U.S. and globally; whether we are able to successfully submit an emergency use authorization in the future, and the outcome of any such emergency use authorization submission; whether research and development efforts will improve efficacy of adintrevimab against predominant variants or identify additional monoclonal antibodies or combination of antibodies for the prevention and treatment of COVID-19 and other infectious diseases; whether research and development efforts will identify and result in safe and effective therapeutic or preventative options for other infectious diseases in the U.S. or globally and whether we have adequate funding to meet future operating expenses and capital expenditure requirements. Other factors that may cause our actual results to differ materially from those expressed or implied in the forward-looking statements in this press release are described under the heading "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2021 and our Quarterly Report on Form 10-Q for the quarter ended September 30, 2022, each filed with the Securities and Exchange Commission (the "SEC"), and in our other filings with the SEC, and in Invivyd's future reports to be filed with the SEC and available at [www.sec.gov](http://www.sec.gov). Such risks may be amplified by the impacts of the COVID-19 pandemic. Forward-looking statements contained in this press release are made as of this date, and Invivyd undertakes no duty to update such information whether as a result of new information, future events or otherwise, except as required under applicable law.
